## ENVIRONMENTAL PERFORMANCE ASSESSMENT CARE AND RESPECT FOR THE ENVIRONMENT

ALJUAN, SL is a company committed to the environment that has implemented an Integrated Management System (ISO 9001, ISO 14001 and ISO 45001).

It carries out an evaluation of environmental performance through which measures are established to control the environmental aspects of the activity we generate. Some of these measures become environmental objectives.

We have defined an emergency action procedure to prevent the generation of aspects associated with emergency situations and we periodically carry out drills that allow us to train and sensitize our workers, as well as ensure that we have the necessary means (technical and human) to act in case of occurrence.

By installing solar panels, we have reduced the consumption of resources. Our waste generation is not significant. In addition, we do not pollute soil, water or atmosphere.

If you are interested in getting more detail, please contact us.
